

SK TRANSLINES · ROLE-BASED ERP ACADEMY

SK Logistics ERP Training System

From new hire to ready-to-work, trained inside the ERP for their exact job.

123

ERP screens covered

175

lessons

9

role curricula

3

screen languages

THE CHALLENGE

New employees should not learn the ERP by trial and error

A big system

Over 120 screens across operations, rail, fleet, finance, workshop, CRM and HR.

Our people

Teams in tier 2 and 3 cities prefer short steps, their own language and listening over reading.

Mistakes cost

A wrong LR, a missed POD or a late bill delays payment and upsets customers.

From login to ready-to-work, in eight steps

1

Admin creates the login

2

Role and permissions set

3

First login, own password

4

Welcome and app tour

5

Role lessons with audio

6

Safe practice on sample data

7

Quizzes and final assessment

8

Ready – manager confirms

BY THE NUMBERS

Every meaningful screen, every role

123

ERP routes covered

175

lessons

210

quiz questions

39

practice exercises

14

end-to-end workflows

66

glossary terms

9

role curricula

3

languages: English, Hindi,
Marathi

User management you can trust

Real login accounts in PostgreSQL, with training readiness shown against every employee.

Admins can

- Create and edit employees
- Assign role, branch and department
- Grant or remove screens per person
- Activate, deactivate or soft delete
- Reset a password – shown only once

The system protects

- Own password forced at first login
- The last Super Admin can't be removed
- No one can deactivate or delete themselves
- Sessions end after role, permission or password changes
- Every change audited; passwords never logged

ROLE-BASED ACADEMY

Each person learns only their job

The curriculum is built from the employee's role and screen permissions. Combined roles get one merged plan with no repeated lessons.

Advanced & Manager Training

CONTEXTUAL HELP

Help on every screen, when it's needed

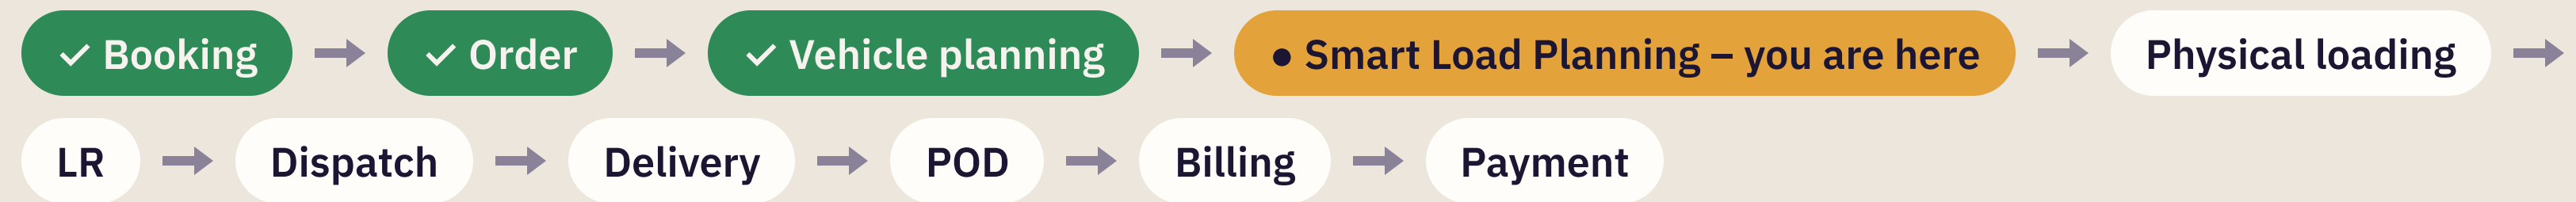

What this screen does	Why it exists	When to use it	What comes before
What comes after	Guided walkthrough	Field explanations	Status explanations
Common mistakes	Related screens	Hinglish audio	Practice this screen

Plus the full lesson, an "I understand" button, and hints that remember when they were dismissed – saved to the employee's training record.

14 END-TO-END WORKFLOWS

Workflows, not just screens

Road transport: where I am → what I completed → what happens next

Rail

GRN, wagon loading, rake,
DGRN, delivery challan

Finance

POD to bill, partial and full
payment, detention

CRM

Enquiry, deal, rate contract,
booking hand-off

Fleet & workshop

Trips, diesel, job cards,
spares and stock

PRACTICE MODE

Learn by doing, with zero risk

Exercises run on sample data kept on the device. Company records are never touched, and practice data resets any time.

Task	Expected	Your action	Result
Create a customer order	New order, Pending	Order created for the customer (Pending)	✓ Pass
Confirm the order	Order Confirmed	Order is still Pending	Needs correction
Make the LR and dispatch	LR In Transit	LR dispatched on own truck	✓ Pass

Example exercise. The ERP checks each step automatically and saves the result to the employee's record.

AUDIO AND LANGUAGE

Learning in the language people think in

Every lesson and screen tip is narrated in natural Hinglish, explaining the work, not reading out labels.

 Play, pause, previous, next and speed

 Captions when a phone has no Hindi voice

 Screens in English, Hindi and Marathi

 Lessons marked heard and completed

Readiness you can measure

Readiness score – default weights, set by admins

Quiz scores alone never make someone Ready. Practice and the final role assessment are required, with best score, attempts, retakes and a review of every wrong answer.

PERSISTENT ONBOARDING

Progress follows the employee, not the browser

Everything is saved on the server against the employee's login. Change phone or computer and the training continues where it stopped.

Tracked for every employee

 Welcome	 App tour
 Screen visits	 Search activity
 Screen tours	 Hints

Always in the employee's control

FOR MANAGERS

"Is this employee ready for their job?"

Training dashboard

Progress, readiness, practice and quiz scores for everyone, filtered by role, branch and status.

Employee profile

Lessons done and missing, quiz attempts, failed topics and recommended retraining.

Coverage matrix

Every ERP screen: help, lesson, audio, walkthrough, quiz and practice – gaps shown at a glance.

Never out of date

A coverage test flags any new ERP screen that has no training yet.

BENEFITS

What SK Logistics gains

Faster onboarding

New staff follow a ready plan for their job instead of shadowing colleagues.

Fewer mistakes

Lessons and quizzes teach the ERP's real rules for LR's, POD, billing and dispatch.

Inclusive

Hindi, Marathi and Hinglish audio suit teams in every branch.

Safe to practise

Sample data on the device; live company records stay untouched.

Clear accountability

Managers see who is ready, who is stuck and what to retrain.

Secure access

Real logins, per-person permissions and a full audit trail.

NEXT STEPS

Every employee, trained for their exact job – inside the ERP.

1

Pilot with one branch

2

Set readiness rules

3

Roll out to all branches
